

MODEL**XC****SERIES 14**

HOPPER SHAPE KNIFE GATE VALVE

The **XC (SER.14)** model knife gate is a uni-directional wafer valve designed for industrial bulk handling service applications (powdered and granular products). The special design of the body allows for easy passage of the fluid and makes it ideal for use as silo outlet valve. Widely used in industries such as:

- Power plants
- Chemical plants
- etc.
- Food and Beverage
- Mining

The valve is normally installed in the reverse position (seat upstream) in order to avoid problems like build-up in valve body, seat wear, difficult closing,...

Sizes: DN 2"/50mm to DN 24"/600mm (larger diameters on request)

Working pressure:	(Standard)	OFF SEATING	ON SEATING
DN 2"/50mm to DN 10"/250mm		50 psi/(3 kg/cm ²)	150psi/(10 kg/cm ²)
DN 12"/300mm to DN 16"/400mm		30 psi/(2 kg/cm ²)	90psi/(6 kg/cm ²)
DN 18"/450mm		22psi/(1,5 kg/cm ²)	75psi/(5 kg/cm ²)
DN 20"/500mm to DN 24"/600mm		15psi/(1 kg/cm ²)	60psi/(4 kg/cm ²)

Standard flange connection: DIN PN 10 and ANSI B16.5 (class 150)

Note: other flange connections are available on request.

Directives: DIR 2006/42/EC (MACHINES)
 DIR 97/23/EC (PED) Fluid: Group I(b), II (Cat. I, mod. A)
 DIR 94/9/EC (ATEX)

All valves are tested prior to shipping in accordance with the standard developed by the Quality Control Department at ORBINOX.

STANDARD PARTS LIST

Part:	Cast Iron:	Stainless Steel:
1- Body	GJL 250 (GG25)	CF8M
2- Gate	AISI 304	AISI 316
3- Seat	Metal or EPDM	
4- Packing	PTFE Impreg. Synth. Fiber (With a EPDM o-ring)	
5- Gland Follower	Aluminium (DN 2"/50mm to DN 12"/300mm) or Ductile Iron (DN 14"/350mm to DN 40"/1000mm)	CF8M
6- Seat retainer ring	AISI 304	AISI 316
7- Stem	AISI 430	
8- Stem nut	Brass	
9- Yoke	Carbon Steel - Epoxy coated	
10- Cleaning	Carbon Steel	
11- Friction washer	Brass	
12- Handwheel	$\varnothing \leq 12,20"/310\text{mm}$: Ductile Iron / $\varnothing \geq 14"/410\text{mm}$: GJL 250 (GG25)	
13- Cap	Plastic	
14- Stem Protector	Epoxy-coated Carbon Steel	
15- Nut	Zinc plated Carbon Steel

MODEL

XC

SERIES 14

DESIGN FEATURES

BODY:

Wafer style cast **monoblock** design with reinforced ribs in larger diameters for extra body strength.

Internal cast gate wedges and guides allow for tighter shut-off.

Special cast gate supports prevent seat from deflecting off the gate when valve is installed in the reverse position of the flow direction.

Wide face to face and internal design with flushing corners avoid any build up of solids that would prevent valve from closing.

Full port design for greater flow capacity and minimal pressure drop.

Standard flush ports allow cleaning of solids trapped within the body cavities that can obstruct the flow or sealing in the closed position.

Purge ports can be injected with air, steam, liquids, etc. depending on the media.

GATE:

Stainless steel gate as standard.

Gate is polished on both sides to avoid jamming and seat damage.

Bottom of the gate edge is machined to a bevel to cut through solids for a tighter seal in the closed position. On request: thickness and/or material of the gate can be changed for higher pressure requirement.

SEAT: (resilient)

Unique design that mechanically locks the seat in the internal of the valve body with a stainless steel retainer ring.

Standard EPDM also available in different materials such as Viton, PTFE, etc.

PACKING:

Long-life packing with several layers of braided fibre plus an EPDM o-ring, with an easy access packing gland ensuring a tight seal.

Long-life braided packing is available in a wide range of materials.

STEM:

The standard stainless steel stem offers a long corrosion resistant life.

For rising stem handwheel actuators only, a stem protector is provided for additional protection against dust while the valve is in the open position.

ACTUATORS:

All actuators supplied by **ORBINOX** are interchangeable, and supplied with a standard mounting kit to allow for interchangeability on site.

YOKE or ACTUATOR SUPPORT:

Made of EPOXY coated steel (stainless steel available on request).

Compact design makes it extremely robust even under the most severe conditions. Reinforced design is standard starting from DN 10"/250mm.

EPOXY COATING:

The epoxy coating on all **ORBINOX** cast iron and carbon steel valve bodies and components is electrostatically applied making the valves to be corrosion resistant with a high quality finished surface.

The **ORBINOX** standard colour is RAL-5015 blue.

GATE SAFETY PROTECTION:

***ORBINOX** automated valves are provided with gate guards in accordance with **EU** Safety Standards.

The design feature prevents any objects from being caught accidentally while the gate is moving.

* IN EUROPE ONLY

MODEL

XC

SERIES 14

OTHER OPTIONS

Bonnet (Fig.1):

Assures tight sealing to atmosphere for use with hazardous gas or fluids.
Reduces packing maintenance.

Other materials of construction:

Special alloys such as AISI 317, 254SMO, Hastelloys, Titanium,...

Fabricated valves:

ORBINOX is equipped for in house fabrication of special valves.
Depending on the design, diameter, pressures, material of construction,...

SURFACE TREATMENTS

Valve components can be protected or coated for a longer life expectancy, depending on the application and the service conditions.

At **ORBINOX** we can offer treatments and coatings for the valve components to improve the properties against **abrasion** (Stellite, Polyurethane...), **corrosion** (Halar, Rilsan, Galvanised...) and **adherence** (Polishing, PTFE...).

Fig.1

ATEX

Please contact our Orbinox representative for info and availability.
Some considerations:

- Hand operated XC(SER.14) valves have been subjected to an ignition risk assessment according to DIN EN 13463: 1-5 and they are out the scope of application of ATEX Directive. Therefore hand operated valves are suitable for ALL ATEX zones.
- Electrical, pneumatical and hydraulically operated valves must be subjected to a conformity assesment of their own and also of the whole unit valve-actuator to get EC Type Approval to Directive 94/9.

MODEL

XC

SERIES 14

ACTUATOR TYPES

Manual:

Handwheel (rising & non-rising stem)
Chainwheel
Lever
Bevel Gear
Others (square nut...)

Automatic:

Electric
Double Acting Pneumatic
Single Acting Pneumatic
Hydraulic

All actuators supplied by ORBINOX are interchangeable.

FAIL SAFE SYSTEMS

Used on pneumatic actuated valves,

SINGLE ACTING / SPRING RETURN

Available from DN 2"/50mm to DN 8"/200mm

Options:

- Fail open
- Fail closed

SINGLE ACTING / VOLUME TANK

Available for all sizes (DN>8"/200mm)

Options:

- Pneumatic Failsafe
- Pneumatic or Electric Failsafe

ACCESSORIES

- Mechanical stops
- Locking device
- Manual override
- Solenoid valves
- Positioners
- Limit switches
- Proximity switches
- Floor stands
- Stem extensions

Wide range of valve extensions available.

For further information about fail safe systems and valve extensions, please see EX(SER.10) chapter.

We recommend consultation with our technical department.

TEMPERATURE CHART

SEAT / SEALS				PACKING				
Material	Max.Temp.(F°)	(°C)	Applications	Material	Max. Temp.	(F°)	(°C)	pH
Metal/Metal	>482	>250	High temp. Low tightness.	Dry cotton (AS)		122	50	6 - 8
EPDM (E)	248	120	Acids and non mineral oils.	PTFE impregn. synth. fibre (ST)		464	240	2 - 13
Nitrile (N)	248	120	Resistance to petroleum products.	Braided PTFE (TH)		500	260	0 - 14
Viton (V)	392	200	General chemical service. High temperature.	Graphited (GR)		1112	600	0 - 14
Silicone (S)	482	250	Food service. / High temperature.	Ceramic fibre (FC)		2192	1200	—
PTFE (T)	482	250	Corrosion resistance.					

NOTE: all types include an elastomere O-ring (same material as seal), excluding TH, GR and FC.

More details and other materials under request.

SEAT TYPES

METAL / METAL

- For applications with:
- High temperature
 - High density media application
 - When full tightness is not required

RESILIENT, TYPE "A"

- Standard resilient seat
- Temperature limitations according to seat material selected. Consult the above chart or our technical department for more information.
- Replaceable seat retainer ring.

TYPE "B" SEAT (metal/metal)

- For applications with:
- High temperature
 - High density media application
 - When full tightness is not required
 - Replaceable design without dismantling the valve

TYPE "B" SEAT (resilient)

- Temperature limitations according to seat material selected. Consult the above chart or our technical department for more information.
- Replaceable and reinforced seat ring available in different materials such as: stainless steel, CA15, Ni Hard,...

DEFLECTION CONE "C"

- Deflects the media away from any internal exposed parts of the valve such as gate guides, seat, etc.
- Different types of material available such as AISI 316 stainless, CA15, Ni-Hard, etc.

Face to face dimensions increase:
 DN 2"/50mm to DN10"/250mm X = 0.35"/9mm
 DN 12"/300mm to DN24"/600mm X = 0.47"/12mm
 Larger diameters on request

MODEL**XC****SERIES 14****HANDWHEEL (rising stem)**

- Standard handwheel actuator.
- Consists of:
 - Handwheel: Epoxy coated Cast Iron
 - Stem
 - Stem nut
 - Stem protector
- Available from DN 2"/50mm to DN 24"/600mm
- Options (on request):
 - Locking Device
 - Extensions and floor stand

MODEL**XC****SERIES 14**

PNEUMATIC CYLINDER

- The standard pneumatic actuator (double acting on-off cylinder) consists of:
 - DN 50-250: Aluminum barrels
 - DN \geq 300: Composite barrels
 - Stainless Steel (AISI 304) piston rod
 - Nitrile coated steel piston
- Available in DN 2"/50mm to DN 24"/600mm
- Supply Pressure: minimum 50psi/(3.5 kg/cm²) - maximum 150psi/(10 kg/cm²)
- Actuator designed with 6 kg/cm² air supply
Reinforced design of support plates (U-type) is standard starting from DN 10"/250mm.
- Options:
 - Hard anodized jacket and covers
 - Over/Undersized cylinder
 - Stainless Steel jacket and covers
 - Manual override)
 - Fail safe system
 - Travel stops
- Instrumentation (on request):
 - Positioners
 - Flow regulators
 - Solenoid valves
 - Air preparation units

MODEL**XC****SERIES 14****ELECTRIC ACTUATOR**

- Consists of:
 - Electric motor
 - Rising stem
 - Motor support yoke flange (Acc. to ISO 5210/DIN 3338)
- The standard electric motor is equipped with:
 - Manual emergency operation
 - Limit switches (open/closed)
 - Torque switches
- Available from DN 2"/50mm to DN 24"/600mm
- Wide range of types and makes available to meet customer's needs.
- Option:
 - Non rising stem
