

MODEL**BT****SERIES 21**

HEAVY DUTY KNIFE GATE VALVE

The **BT(SER.21)** model knife gate is a bi-directional lug type valve designed according to MSS-SP-81 and TAPPI TIS 405-8 for industrial service applications. The design of the body and seat assures non-clogging shut off on suspended solids in industries such as:

- Pulp and Paper
- Chemical plants
- etc.
- Power plants
- Wastewater
- Mining
- Food and Beverage

Sizes: DN 2"/50 to DN 24"/600 (larger diameters on request)

Working pressure: DN 2"/50 to DN 24"/600: 150psi / 10kg/cm²

Standard flange connection: ANSI B16.5 (class 150)
Others on request

Directives: DIR 98/37/CE (MACHINES)
DIR 97/23/CE (PED) Fluid: Group 1(b), 2 (Cat. I, mod. A)
DIR 94/9/CE (ATEX) Please contact Orbinox for information and availability of categories and zones.

All valves are tested prior to shipping in accordance with the standard developed by the Quality Control Department at ORBINOX.

STANDARD PARTS LIST

Part:	Stainless Steel:
1- Body	CF8M
2- Gate	AISI 316
3- Seal	EPDM
4- Packing	PTFE Impreg. Synth. Fibre + EPDM O-Ring
5- Gland Follower	CF8M
6- Stem	AISI 430
7- Stem Nut	Brass
8- Yoke	Carbon Steel - Epoxy Coated
9- Collar	Nylon
10- Handwheel	Ductile iron A536 (60-40-18)
11- Shaft collar	Stainless steel
12- Nut	Stainless steel
13- Thrust Washer	Brass

SERIES 21

DESIGN FEATURES

BODY:

One piece integrally cast stainless steel body with reinforced ribs in larger diameters for extra body strength.
Internal cast guides allows for tighter shutoff.
Port design according to MSS-SP-81 and Tappi TIS 405-8.
Internal design avoids any build up of solids that could prevent valve from closing.

GATE:

Standard AISI 316 stainless steel gate.
Gates polished and lapped for a greater seal between the gate and both the packing and seat.

SEAT: (resilient)

Retained in the valve body internal groove by its trapezoidal shape.
Standard EPDM; also available in different materials such as Viton, nitrile, etc.

PACKING:

Standard braided PTFE impregnated fibre with EPDM o-ring for better shut off, with an easy access packing gland ensuring a tight seal
Long-life braided packing is available in a wide range of materials.

STEM:

The standard stainless steel stem offers a long corrosion resistant life.
For rising stem handwheel actuators only, a shaft collar is provided for protection and regulation of the stroke.

ACTUATORS:

All actuators supplied by **ORBINOX** are interchangeable, and supplied with an standard mounting kit to allow for installation on site.

YOKE or ACTUATOR SUPPORT:

Made of EPOXY coated steel (stainless steel available on request).
Compact design makes it extremely robust even under the most severe conditions.

EPOXY COATING:

The epoxy coating on all **ORBINOX** cast iron and carbon steel valve bodies and components is electrostatically applied making them corrosion resistant with a high quality finished surface.
The **ORBINOX** standard colour is RAL-5015 blue.

GATE SAFETY PROTECTION:

***ORBINOX** automated valves are provided with gate guards in accordance with EU Safety Standards.
The design feature prevents any objects from being caught accidentally while the gate is moving.

OTHER MATERIALS:

On request, the body and the gate can be supplied in other materials.

* IN EUROPE ONLY

MODEL

BT

SERIES 21

ACTUATOR TYPES

Manual:

Handwheel (rising & non-rising stem)
Chainwheel
Bevel Gear
Other (square nut...)

Automatic:

Electric
Double Acting Pneumatic
Single Acting Pneumatic
Hydraulic

All actuators supplied by ORBINOX are interchangeable.

FAIL SAFE SYSTEMS

Used on pneumatic actuated valves

SINGLE ACTING / SPRING RETURN

Available from DN 2"/50 to 8"/200

Options:

- Fail open
- Fail closed

SINGLE ACTING / VOLUME TANK

Available for all sizes (DN>8"/200)

Options:

- Pneumatic Failsafe
- Pneumatic or Electric Failsafe

ACCESSORIES

Mechanical stops
Locking device
Manual override
Solenoid valves
Positioners
Limit switches
Proximity switches
Floor stands
Stem extensions

Wide range of valve extensions available.

For further information about fail safe systems and valve extensions, please see EX chapter.

We recommend consultation with our technical department.

TEMPERATURE CHART

SEAT / SEALS			PACKING		
Material	Max.Temp.(°C)	Applications	Material	Max. Temp. (°C)	pH
EPDM (E)	120	Acids and non mineral oils.	Dry cotton (AS)	50	6 - 8
Nitrile (N)	120	Resistance to petroleum products.	PTFE impregn. synth. fibre (ST)	240	2 - 13
Viton (V)	200	General chemical service. High temperature.	Braided PTFE (TH)	260	0 - 14
			Graphited (GR)	600	0 - 14
			Ceramic fibre (FC)	1200	—

More details and other materials upon request.

NOTE: all types include an elastomere O-ring (same material as seal), excluding TH, GR and FC.

SEAT TYPES

Resilient seat:

The seat is retained in the valve body's internal groove by its trapezoidal shape and is in contact with the gate around its perimeter. This design provides water-tightness and seamless liquid flow in both directions while avoiding any build-up of solids that could prevent the valve from closing.

HAND OPERATED (Rising stem)

HANDWHEEL

GEAR

- Standard handwheel actuator. Available from DN 2"/50 to DN 10"/250
- Consists of:
 - Handwheel: Ductile iron
 - Stem
 - Stem nut
 - Shaft collar
 - Yoke
- Options (on request):
 - Chainwheel
 - Locking Device
 - Extensions

- Recommended for valves larger than DN 10"/250 and working pressures greater than 50 psi / 3.5 kg/cm². Available from DN 8"/200 to DN 24"/600.
- Consists of:
 - Stem
 - Yoke
 - Bevel Gear Actuator with Handwheel (Standard Ratio 4:1)
 - Shaft collar
- Options:
 - Chainwheel
 - Locking Device
 - Extensions

PNEUMATIC CYLINDER

- The standard pneumatic actuator (double acting on-off cylinder) consists of:
 - Aluminium jacket and covers
 - Stainless Steel (AISI 304) piston rod
 - Nitrile coated steel piston
- Available from DN 2"/50 to DN 24"/600
- Air supply pressure: Actuator designed with 85 psi / 6 kg/cm²
- For valves installed in a horizontal position, we recommend U-type support plates and/or actuator support.
- Options:
 - Hard anodized jacket and covers
 - Over / Undersized cylinder
 - Stainless Steel jacket and covers
 - Manual override
 - Fail safe systems
 - Travel stops
- Instrumentation (on request):
 - Positioners
 - Flow regulators
 - Solenoid valves
 - Air preparation units

SERIES 21

ELECTRIC ACTUATOR (Non-rising stem)

- Consists of:
 - Electric motor
 - Non-rising stem
 - Motor support yoke
(Acc. to ISO 5210/DIN 3338)
- The standard electric motor is equipped with:
 - Manual emergency operation
 - Limit switches (open/closed)
 - Torque switches
- Available from DN 2"/50 to DN 24"/600
- Wide range of types and makes available to meet customer's needs.
